

ASSIGNMENT NO:2

TOPIC : Build a python code to detect alarm in case of high Temperature.

BATCH NO :B3-3M5E

TEAM ID : PNT2022TMID33556

TEAM MEMBER 2 : MATHIVANAN B

PYTHON CODE:

```
def check(temp):  
    if(temp>43):  
        print("Temperature is high")  
        print("Humanity is low")  
    elif(temp<28):  
        print("Temperature is low")  
        print("Humanity is low")  
    else:  
        print("Normal Temperature")  
        print("Normal Humanity")  
  
import random  
  
temp = random.randint(-25,55)  
  
check(temp)
```

INPUT:
temp=45

OUTPUT:
Temperature is high
Humanity is low
