ASSIGNMENT NO:2

TOPIC : Build a python code to detect alarm in case of high Temperature.

BATCH NO :B3-3M5E

TEAM ID : PNT2022TMID33556

TEAM LEADER : NAGENTHIRAN M

PYTHON CODE:

```python
import random

temp = random.randint(-20, 60)

if(temp>40):

        print("Temperature is high")
        print("Humanity is low")

elif(temp<30):

        print("Temperature is low")
        print("Humanity is low")

else:

        print("Normal Temperature")
```

INPUT:

    temp=26

OUTPUT:

    Temperature is low

     Humanity is low
